

Adrian Azucena

Backend Engineer

Imus, Cavite, Philippines | +63 929 413 3809 | azucenavadrian@gmail.com

PROFILE

Backend Engineer with 5+ years of experience building scalable backend systems across financial services, e-commerce, and web applications. SME and Acting Technical Lead for Deposit Tech, leading architecture, regulatory initiatives, migrations, and production engineering. Strong background in Node.js, TypeScript, AWS, SQL/NoSQL databases, distributed systems, and performance optimization

EMPLOYMENT HISTORY

Software Engineer, UBX Philippines Corp. (Uniondigital Bank Inc.) — Pasig City *Sep 2024 — Present*

Subject Matter Expert (SME) & Acting Tech Lead, Deposit Tech Domain

- **Lead architecture and technical decisions** for Savings Accounts and Time Deposits on Thought Machine Vault, **serving as SME and Acting Technical Lead** for the Deposit domain.
- **Delivered BSP regulatory initiatives**, including legacy account migrations, dormancy handling, and AFASA implementation, ensuring compliance and production stability.
- **Re-architected account migration processing into a distributed batch pipeline with 100 concurrent workers**, increasing throughput **6.7x (2.93 → 19.57 accounts/sec)** and reducing estimated runtime for 500K-account migrations from **~47 hours to ~7 hours**.
- **Mentored 8 engineers** through architecture reviews, code reviews, and technical knowledge sharing; leveraged AI/LLM tools (Claude) for code review, root-cause analysis (RCA), incident documentation, system architecture analysis, and technical writing.

Software Engineer, Singlife Philippines — Taguig City *May 2023 — Sep 2024*

- **Delivered 5+ backend feature enhancements** by translating business requirements into production-ready solutions in collaboration with architects.
- **Enhanced internal CRM tooling with 3+ features**, reducing user support tickets by **30%** and improving user satisfaction.
- **Supported three internal platforms** as a cross-platform backend engineer, reducing knowledge silos and improving incident response.

Backend Developer, Octagrowth Inc. — Taguig City *Jul 2022 — Feb 2023*

- **Led a team of 3 developers** in implementing an AWS Cognito-based Single Sign-On (SSO) system, reducing account-creation support overhead.
- **Reduced blockchain API calls by 50% through Redis caching**, lowering infrastructure costs and improving NFT retrieval latency by **200ms**.
- **Implemented RabbitMQ-based asynchronous mail processing**, reducing queue latency by **60%** and enabling **3x higher throughput** under peak load.

Backend Developer, Gotabrand Global Solutions Inc. — Makati City *Sep 2021 — Jul 2022*

- **Led a 2-engineer team** in modernizing a food delivery platform into a RESTful API architecture, improving data flow and database models.
- **Automated the development pipeline**, reducing build time from **2 hours to 1.2 hours**.

Backend Developer, Highly Succeed Inc. — Mandaluyong City *Mar 2021 — Sep 2021*

- **Developed and maintained RESTful APIs** using Laravel Lumen and AdonisJS for front-end applications.
- **Resolved 95% of QA-identified defects** and established a root-cause analysis process that reduced regression rates by **40%** in subsequent sprints.

EDUCATION

Bachelor of Science in Computer Engineering

Rizal Technological University, Mandaluyong City | Mar 2015 — Mar 2021

SKILLS

Languages: TypeScript, JavaScript, Python, PHP

Backend: Node.js, NestJS, Express.js, Fastify, Laravel, Laravel Lumen

API & Architecture: REST APIs, GraphQL, API Development, API Integration, Microservices, Distributed Systems, Event-Driven Architecture, System Design

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

Cloud & Infrastructure: AWS (API Gateway, Lambda, EC2, EKS, App Runner, RDS, DynamoDB, S3, SQS, SNS, EventBridge, CloudWatch, Secrets Manager, Parameter Store, IAM), Terraform, Docker, Nginx

Messaging & Asynchronous Processing: RabbitMQ, Apache Kafka

Security & Authentication: AWS IAM, AWS Cognito, OAuth, JWT

Version Control & CI/CD: Git, GitLab CI/CD, Bitbucket pipeline, Jenkins

Testing & Quality: Jest, SonarQube, Postman, Unit Testing, Root Cause Analysis

Banking & Fintech: Thought Machine Vault, Core Banking, Smart Contracts, Blockchain

Engineering: Data Migration, Performance Optimization, Production Support, Technical Documentation, Workflow Automation, AI-Assisted Development

LANGUAGES

English — Full Professional Proficiency

Tagalog — Native Speaker
